

Design Tokens, Color Swatches & Typography System

Standardized visual assets, accessibility contrast ratios (WCAG AAA compliant for direct sunlight visibility), and component token library for Figma auto-layout implementation.

Color Palette & Semantic Tokens

Emerald Primary

#047857

Primary Action Buttons & CTAs

Mint Accent

#10B981

Positive Mandi Gains & Badges

Forest Dark

#052E16

Deep Header & Contrast Cards

Harvest Amber

#D97706

Mandi Alerts & Weather Warnings

Sky Blue

#0284C7

Moisture, Rain & Radar Hub

Alert Red

#DC2626

Pest Danger & Price Drops

Typography Scale (Google Fonts: Outfit & Plus Jakarta Sans)

Display 32 / Bold

Hero Weather Temp • Big Keypad Display

Heading 20 / SemiBold

Section Titles • Card Headers

Body 14 / Medium

Mandi Table Rows • Advisory Bullet Points

Mono 12 / Bold [Price INR]

Live Ticker Numbers • Coordinate Lat/Long

Agricultural UX Rules for Figma Prototyping

1. The 3-Tap Core Workflow Rule

Any critical daily action (Recording an expense, checking APMC Mandi rates for current crop, or inspecting rainfall probability) must be completed within 3 taps from screen launch.

2. Minimum 48x48px Touch Targets

Farmers interacting in direct outdoor sunlight or with soil-dusted hands require oversized buttons with 12px padding and clear active state feedback.

3. Trilingual Parity

Every component supports real-time language toggling across English, Telugu (తెలుగు), and Hindi (हिन्दी) without clipping or layout shifts.

4. Offline-First Caching Visual States

All weather and market cards provide visual indicators when displaying cached data during intermittent connectivity in rural farmland.

Farmer Authentication & Frictionless Profile Setup

Designed for rural adoption: 4-digit quick PIN, instant OTP bypass for registered farmers, and visual crop selection grid.

[FIGMA PROTOTYPE LINK](#)
Trigger: On Tap [New Account]
Action: Navigate to Screen #02 (Push Left 300ms)

Figma Layer Structure

- 01_Auth_Welcome
 - Frame / PhoneBezel (Fixed)
 - AutoLayout / HeaderNav
 - LogoGroup
 - LangToggle (Variant TE/EN/HI)
 - NumericKeypad (AutoLayout Grid)
 - 12x KeyInstance (48x48 min)
 - BtnPrimary (Hug Contents)
- 02_Onboarding_Wizard
 - ProgressBar (Scale Constraint)
 - LocationChip (GPS Auto)
 - CropGrid (2-col AutoLayout)

Field Dashboard & Ultra-Fast Expense Tracking

Live Open-Meteo micro-climate telemetry, real-time APMC Mandi ticker, and high-speed financial entry keypad designed for single-hand thumb use.

FIGMA OVERLAY ACTION
Trigger: On Tap [Record Expense]
Action: Open Overlay (Center, Dim Background 50%)

Prototype Properties

1. Rapid Keypad Dismissal:

Close button or click outside overlay closes modal and triggers a green Toast banner on Dashboard: "₹1,850 recorded successfully".

2. Smart Animate Setup:

Use 'Smart Animate' with 'Ease In & Out' (250ms) for the amount counter increments.

Real-Time Market Arbitrage & Multi-District Radar

Live pricing comparison across APMC mandis, high-contrast price trend tags (+8.4% / -2.1%), and pan-India micro-climate forecasting.

FIGMA BOTTOMNAV CONNECTION
Trigger: On Tap [Radar Tab]
Action: Navigate to Screen #06 (Slide Left 250ms)

All-India Scalability

1. Geolocation Trigger:

navigator.geolocation.getCurrentPosition with reverse lookup.

2. Figma State Variants:

Create 3 variants in Figma:

- State A: GPS Auto-detected
- State B: Manual District Dropdown
- State C: Low Connectivity Offline Cached

Complete Figma Prototype Node Connections

Exact configuration for Figma's "Prototype" tab: triggers, easing curves, navigation types, and overlay coordinates.

Flow ID	Start Node (Source)	User Trigger	Action Type	Destination Frame	Animation & Easing
FLOW-01	#01_Auth_Welcome → [Sign In]	On Click / Tap	Navigate To	#03_Portal_Dashboard_1440	Smart Animate • Ease In & Out (300ms)
FLOW-02	#01_Auth_Welcome → [New Farmer]	On Click / Tap	Navigate To	#02_Onboarding_Wizard	Push Left • Gentle Curve (350ms)
FLOW-03	#03_Dashboard → [+ Record Expense]	On Click / Tap	Open Overlay	#04_Rapid_Keypad_Modal	Slide Up • Center Overlay • Dim 50%
FLOW-04	#04_Keypad → [Save Entry]	On Click / Tap	Close Overlay	Previous Frame (Dashboard)	Instant + Trigger Toast Success
FLOW-05	#03_Dashboard → [Mandi Ticker]	On Click / Tap	Navigate To	#05_Mandi_Rates_Explorer	Smart Animate • Quick (250ms)
FLOW-06	Global Header → [Lang Toggle TE/HI]	On Click / Tap	Change Variant	Current Frame (Lang = TE)	Instantaneous text replacement

Figma Build Guide & Rural Usability Pilot Criteria

Follow these rules when pasting or updating these components inside Figma to maintain pixel-perfect responsive behavior and high visual clarity.

Auto-Layout Constraints & Resizing Rules

1. Button Components → Set to 'Hug Contents' (Horizontal)

Buttons dynamically adjust their width when switching between English, Telugu, and Hindi label strings without causing text wrapping or icon overlap.

2. Dashboard Cards → Set to 'Fill Container' (Horizontal)

Parent columns on Desktop (1440px) or Mobile (390px) allow all metric cards, Mandi tickers, and weather badges to stretch proportionally across viewports.

3. 8pt Spacing Tokens in Figma Spacing Variables

Use uniform spacing increments: 8px (Tight), 16px (Standard Card padding), 24px (Section separation), and 32px (Page margins).

5-Second Usability Verification Checklist

Direct Sunlight High-Contrast Legibility

Primary green (#047857) against white text reaches a contrast ratio of 7.2:1 (exceeds WCAG AAA).

15-Second Expense Entry Flow Verified

Farmers can enter amount + choose category + submit within 3 gestures without typing.

Zero Layout Distortion in Trilingual Switch

Telugu and Hindi script rendering tested with adequate line-height (1.45) to prevent glyph clipping.
